THESIS ABSTRACT

Extending Cognition in Epistemology: Towards an Individualistic Social Epistemology

Conceiving of knowledge as a cognitive phenomenon, mainstream epistemologists justifiably focus on the individual as the proper epistemic subject. Yet, clearly, knowledge-acquisition many times appears to be a social process and sometimes to such an extent—as in the case of scientific knowledge—that it has been argued there might be knowledge that is not possessed by *any* individual alone. In order to make sense of such contradictory claims, I combine virtue reliabilism in mainstream epistemology with two hypotheses from externalist philosophy of mind, *viz.*, the extended and distributed cognition hypotheses. Reading virtue reliabilism along the lines suggested by the hypothesis of extended cognition allows for a weak anti-individualistic understanding of knowledge: Knowledge, many times, has a dual nature; it is both social and individual. Provided, however, the possibility of distributed cognition and group agency, we can also make the case for a robust version of anti-individualism: Knowledge may not always be the product of any individual's cognitive ability and, thereby, not creditable to any individual alone; knowledge, instead, might be the product of an epistemic group agent's collective cognitive ability and, thus, attributable only to the group as a whole. Still however: Being able—on the basis of the hypothesis of distributed cognition—to recognize a group as a cognitive subject in itself allows for proponents of virtue reliabilism to legitimately apply their individualistic theory of knowledge to such extreme cases as well. This provides mainstream epistemology with the means to make sense of the claim that *p* is known by *G* (the group agent), even though it is not known by any individual alone.

SKILLS

2021: 200-HOUR Yoga Teacher Training RYT at Online Yoga School

2015 – 2019: Acting Classes - Edinburgh Acting School; Actorsworkshop (Cardiff); Chapter Actors Workshop (Cardiff)

2006: Diploma of Piano in Classical Music, Musical Horizons Conservatory (Certified by the Greek Ministry of Education), Athens.

2004: Diploma of French studies - 2nd degree (option: literature), University of Paris, Sorbonne.

Military Service: I have completed my service in the Hellenic Navy.

Other Languages: Greek, native; English, fluent; Italian (studied for 2 years: moderate reading, writing, and speaking skills).
